

I object to Sinclair Broadcasting's decision to use free public airwaves force their stations to air an anti-Kerry documentary days before the election.

Media owners are required to use public airwaves in the public interest. Sinclair is using the airwaves against public interest when it solely advances its own political interests, without presenting both sides. It is the FCC's duty to insure that public airwaves are used in the public interest.

Please consider my comments in the license renewal process. Thank you.
